## Manually configure outlook for office 365 login portal email students

Open Outlook. On the 'HawkID@uiowa.edu' has been added prompt, click Done. If you are prompted to Personalize Now, follow the prompts to setup Outlook with your preferences Close the Accounts window. Note: If you receive a message: "Outlook was redirected to the server ...". Select "Always use my response for this server" and click Allow. Your version of Outlook is now up to date and you may proceed to set up a connection to the Microsoft Exchange Server. Note: A recent update has changed how some profiles send your Office365 email. If you have messages sending from HawkID@uiowa.edu instead of your email alias eg: firstname.lastname@uiowa.edu or if people are having trouble viewing your shared calendar, then you will need to update your profile. Select the Tools tab and click Accounts On the Accounts Screen; Select your Office365 account If you have more than one email account added. Here's a quick guide that walks you through the process of manually configuring Outlook for Office 365, on both Windows 7 and 8. The Mail Setup dialogue box appears. Click Continue, to finish the set up. Incoming settings: outlook.office365.com port 995 SSL applied/ticked Outgoing server settings: smtp.office365.com port 587 SMTP authentication applied/ticked TLS applied/ticked Authentication - password Open Outlook, and when the Auto Account Wizard opens, choose Next Or, if the wizard doesn't open or if you want to add another email account, choose the File tab on the toolbar. Click Login. Note: If you have Two-Step Login with Duo Security, you will be prompted to complete login using Duo. Type your Hawkid password when prompted for your password. This is your host name - you'll need this later, so copy and paste it into Notepad or write it down. To check, and install, the latest Windows updates, proceed as follows. Change the Account Description to your' UI Email Alias eg: 'firstname.lastname@uiowa.edu' Change the E-mail address to your UI Email Alias eg: 'firstname.lastname@uiowa.edu' Exit the Accounts Window. Click OK twice. The Account Settings page opens on the E-mail tab. A Security Warning pop-up appears. These instructions are for Mac OS 10 and higher First Time Logging In Launch Mac Mail Account configuration will start automatically Choose Mail Type: Exchange Enter your name in the "Name" field In the Email Address field type your HawkID@uiowa.edu (e.g. jdoe@uiowa.edu) In the Password field enter your HawkID password Click Sign In Click Sign In again Enter your HawkID password Click Log In Complete Duo (if enrolled) Verify your account information and the apps you wish to synchronize with Mac Mail and click "done." Next click Preferences | Accounts | Account Information Click Email Address Click Edit Email Addresses Click the + sign Type your email alias (first-last@uiowa.edu) Click OK Select the address to make it the default address. To add an Office 365 Account to your Existing Mac Mailbox Click Mail > Add Account Choose Mail Type: Exchange Enter your name in the "Name" field In the Email Address field type your HawkID@uiowa.edu (e.g. jdoe@uiowa.edu) In the Password field enter your HawkID password Click Sign In Click Sign In again Enter your HawkID password Click Log In Complete Duo (if enrolled) Verify your account information and the apps you wish to synchronize with Mac Mail and click "done." Open the Windows 10 Mail application Click Accounts Choose + Add account Choose Office 365 - Office 365, Exchange On the "Exchange" screen type your email address: HawkID@uiowa.edu Click Next Password: Type your HawkID password in the password field Click Sign In If you have Two-Step Login with Duo Security, you will be prompted to complete login using Duo. With BitTitan MigrationWiz, say goodbye to complexity, long manual processes, and user downtime when migrating to Office 365/Microsoft 365. Outlook 2010 users only Outlook 2010 users must have the latest Windows updates applied before carrying out this task. This is especially handy if you encounter issues with auto-discover attempting to connect to the Exchange server. Manually configuring Outlook is fine, but if you'd like to discover how to automatically and remotely configure Outlook you want to know about the DeploymentPro tool. Click to select the on fast networks, connect using HTTP first, then connect using TCP/IP check box, and select the on slow networks, connect using HTTP first, then connect using TCP/IP check box. Open Outlook. If both are correct, follow the steps to manually set up an account instead. Click Next. The following instructions step through the process of manually configuring your Office 365 Exchange Online account with Outlook 2010, 2013, and 2016 for Windows. The Desktop Application Setup page appears. The Add Account: Choose Service page opens. Click on this file to open it. When prompted that the account was setup successfully, click Done Open your Windows Control Panel. On the "Enter your email address" screen, type your UI Email Alias eg: "firstname.lastname@uiowa.edu". The following window appears. Note: If the test fails, choose More Settings. From the Control Panel items list, click Mail. Deselect the "Setup Outlook on mobile device" option After the account configures, click Done Outlook will open, but it may take several minutes as it prepares for the first use. Enter your email address in the field User Name Click More Settings If you are prompted with an error that the action cannot be completed, click OK Click on the Security tab, and then select Configure Security Settings and switch the network security option to "Anonymous Authentication" Click on the Connection tab Select Connect to Microsoft Exchange using HTTP Click Exchange Proxy Settings In the Use this URL to connect to my proxy server for Exchange box, type: outlook.office365.com. Step #2 - Create new Outlook profile (Windows 7) Open Control Panel Click Mail Click Show Profiles and type a name for the profile Click Add Click OK Click Manually configure server settings or additional server types Click Next Select Microsoft Exchange Click Next For Windows 8: Open Control Panel Click the View by drop-down menu (set to Category by default) Select Small Icons Click Mail Click OK Click Manually configure server settings or additional server types Click Next Select Microsoft Exchange Click Next In the Server box, type the host address that you noted in Step 1. However, we haven't really touched on manual configurations of Outlook. Make sure you've enabled "only connect to proxy servers that have this principal name in their certificate," and then type msstd:outlook.com. A setup\_en.exe file downloads to your desktop. Setting up a connection to the Microsoft Exchange Server To manually set up a connection to the Microsoft Exchange Server, proceed as follows. You can add many different email accounts to Outlook including Gmail, Yahoo, and work or school accounts. On the "Welcome to Outlook" screen, click Add Email Account. Remotely and automatically setup user profiles, signatures, rules, and AutoCompletes after your migration project is complete. Click Finish. If so, then log in as usual, and continue with the next step. Updated 29/09/2021 Learn more about manual Outlook configurations and BitTitan's DeploymentPro tool in this updated post. On the E-mail Accounts page, choose Next > Add Account On the Auto Account Setup page, enter your name, email address, and password, and then choose Next Choose Finish If you see an error message, double check your email address and password. This may be needed when configuring a secondary account, or if you run into issues with the automatic configuration process. Select the Manual setup or additional server types radio button. On the "HawkID Login for 365" screen, Change the HawkID field to your HawkID@uiowa.edu Type your HawkID password in the Password field. Click Continue. Note: Outlook versions prior to Outlook 2010 are not supported, and will not work with Office 365. Open Outlook in the E-mail Address field, type your email address - e.g., jane.doe@uiowa.edu Click Connect. Make sure that the Use Cached Exchange Mode option is selected. If you do not have auto-discover enabled: Open PowerShell and enter the following commands: Set-ExecutionPolicy Unrestricted \$LiveCred = Get-Credential (use your ADMIN credentials) \$Session = New-PSession -ConfigurationName Microsoft.Exchange -ConnectionUri -Credential \$LiveCred -Authentication Basic -AllowRedirection Import-PSession \$Session Get-Mailbox -Identity user\_name | select ExchangeGUID The value displayed will be the host name you saw in the first set of steps. Click Check Names After the server name and user name are displayed with an underline, click next. We talk a lot about automated deployments of Outlook, and how easy this process is made through solutions such as DeploymentPro. So, before you begin this procedure, please ensure Outlook is not running on your computer. Sign up for a FREE BitTitan account today to access our products and services. Select the Microsoft Exchange Server or compatible service radio button. The Add Account: Auto Account Setup page opens. Your administrator might need you make additional changes, including entering specific ports for the incoming server (POP3) or outgoing server (SMTP). Note: We recommend Mac users use the Office 365 Web App to share your calendar or to grant permissions. Go to Go to the Office 365 tab Check Outlook Autodiscover Click Next Input your information Click Perform Test On the result page, click Expand All Look for the first tag You should see a value that looks something like 686c9881-008b-49f5-83ab-e158c37c421@domain.com Note: If the following window appears then Outlook has been detected running on your machine. In the Proxy authentication settings, click Basic Authentication. After a short wait, the following window appears. You can also try changing the outgoing authentication method from TLS to START or Auto Choose Next > Finish These steps set up an Office 365 email account using Outlook 2016 or Outlook 2013 on your PC. When the desktop setup finishes, you may need to restart your computer. Note: If you don't see the Mail option, change your View by setting (top right corner of Control Panel) to either Large Icons, or Small Icons. Ensure there's a tick in the checkbox, Microsoft Outlook (manual steps required). To proceed, you must close Outlook before continuing with the procedure. Prerequisites You cannot manually configure a new Microsoft Exchange account with Outlook running. The process may be broken down into three stages: Setting up a connection to the Microsoft Exchange Server Setting up security and connection details Checking and authenticating. How to manually set up an Office 365 email account Choose Manual setup or additional server types > Next Select the type of account you need, and choose Next Fill-in Your Name, Email Address, Account Type, Incoming mail server, Outgoing mail server, User Name, and Password Choose Test Account Settings to verify the information you entered. Note: At this point, you may be prompted to log in to your Office 365 account. Check out this Q&A article on using DeploymentPro for remote and automatic configuration of Outlook.
